## WEBSITE CHANGES DOCUMENT

# ZENVORA AUTOMATIVE WEBSITE

In this document there are changes made to the zenvora automotive website and I add some stuff in the website like creating an external stylesheet for CSS and linked it to all my five pages and the existing HTML markup was cleaned up to fix errors identified from Part1 feedback and to support the new CSS.

### 1. External stylesheet

- ☆ Created a new file which is CSS file that contains all styling for the website.
- ☆ Linked the stylesheet in the `<head>` of all the five pages (Home, Showroom, Service, About Us and Contact Us) using `<link rel="stylesheet" href="css/StyleSheet.css">`.
- ☆ Removed the old inline `<style>` block that were incorrectly placed inside the `<header>` tag on each page.

### 2. HTML corrections

- Added missing `<body>` tag on Home.html, Showroom.html, Service.html, About Us.html and Contact Us.html.
- Fixed a broken `<img>` tag for the navigation logo that was missing quotation marks and a width properly.
- Removed a duplicate, unclosed `<nav>` tag that was nested inside the main navigation.
- Removed a stray `</details>` closing tag that had no matching opening tag.
- Removed all inline `style="color"` attributes from heading, paragraphs, labels and links moving styling into the external stylesheet for consistency and easier maintenance.

### 3. File changed

- Css/stylesheet-new file added
- Home.html- updated.
- Showroom.html-updated.
- Service.html-updated.
- About Us.html -updated.
- Contact Us.html-updated
